

Another gold medal performance from SHY® (UK)

Crank operated SHY® ZIP® blinds each 2m x 3.9m with bespoke headboxes at the Olympic Aquatic Centre. Expertly installed to a curved glass wall by Soltech Systems.

Bespoke headbox to complement ceiling detail

Product

SHY® ZIP® blinds

Operating Method

Manual gearbox with detachable handle

Dealer

Soltech Systems Limited

Where

Olympic Aquatic Centre, London

The Olympic Aquatic Centre has a training pool separated from the main pool area by full height glazing positioned on a gentle curve.

SHY® (UK)'s dealer, Soltech Systems, were asked to solve the challenge of providing blinds for privacy and knew the solution was the SHY® ZIP® system.

In total 10 blinds 2.9m x 3.9m drop were installed fitted with a bespoke shaped headbox to complement the roof detailing. This headbox and the hem bar

of the blinds were anodised to a specific colour. SHY® (UK)'s Solarblock blackout fabric was used as it is a very robust, water resistant material.

Black ZIP® side channels ensured the fabric was always securely held in the side channels to maintain total privacy.

The blinds were operated by a gearbox located on one side of each headbox and operated by a detachable handle to prevent unauthorised use of the blinds.

SHY (UK). 1 Bilton Road Industrial Estate
Cadwell Lane, Hitchin, Herts. SG4 0SB.
