Product

SHY[®] ZIP[®] Screens

Operating Method

Motorised, radio controlled

Dealer

Volvina Limited

Where

Waddesdon Manor, Buckinghamshire

Built for Baron Ferdinand Rothschild in 1889 the aviary at Waddesdon Manor is made from cast-iron in the style of a rococo trelliswork pavilion. The aviary grotto is used as a gallery for displays of modern art. Three radio controlled ZIP[®] Screen blinds with Mermet Airscreen fabric will protect the modern art and aviary interior from roosting birds and nocturnal animals.

SHY[®] UK designed and built a steel structure to which the blinds were fitted so no part of the Grade I listed building would be affected in any way from installing the blinds.

The fabric is transparent enough for visitors to view the displays and the aviary interior whilst offering a level of security.

SHY (UK). 1 Bilton Road Industrial Estate
Cadwell Lane, Hitchin, Herts. SG4 0SB.
