Operating Method

Motorised with radio control

Where

London

Such is the versatility of SHY® (UK)'s commercial roller blind systems that sometimes they are used in, well, less commercial buildings.

This individually designed London Penthouse incorporated large glazing to maximise views and light. Tensioned SHY® ZIP® roof blinds, and SUNFACTA® and OBSCURA® window blinds were used throughout to control light and heat gain. In family rooms and bedrooms a twin

roller system was used to provide shading using Solarscene fabrics and blackout using Solarblock fabrics depending on the needs of the occupier.

And in every room the fabric was different depending on the orientation and decor.

All blinds were motorised and operated by radio controlled switching.

Unique interiors need unique solutions.

SHY (UK). 1 Bilton Road Industrial Estate
Cadwell Lane, Hitchin, Herts. SG4 0SB.
