

Great movement and great control from SHY®

From survey to final fitting installer VBS Centurion gave 110% and the Hilton, well naturally they were over the moon

Motorised with motor fully enclosed in the blind's headbox which was power coated to match the window frames.

Product

SHY® ZIP® blinds

Operating Method

Motorised with radio control

Dealer

VBS Centurion

Where

Milton Keynes, Buckinghamshire

Now available with obstacle detection motor technology

The conference facility at the Hilton Hotel at stadium:mk, the home of the Milton Keynes Dons F.C., posed quite a simple challenge for SHY® (UK)'s dealer, VBS Centurion. Simple because they knew there was a solution.

The requirement was to provide a robust dim-out system to about 45 linear metres of glazing with a drop of almost 3m. The blinds need to be motorised with radio control and the aluminium hardware of the blinds needed to be powder coated to

match the window frames.

This is all bread-and-butter stuff for SHY® (UK) who supplied 18 number SHY® ZIP® Screen blinds with 110mm x 110mm headboxes. The headboxes, channels and bottom bar were all powder coated to the exact colour of course.

The blinds were fitted with SHY® (UK)'s Solarblock B290 fabric which is both blackout and flame retardant.

Another score settled.

SHY (UK). 1 Bilton Road Industrial Estate
Cadwell Lane, Hitchin, Herts. SG4 0SB.
