

Village hall gets SHY® treatment

There aren't many village halls that have such a stunning vista as the one at Porthallow in Cornwall.

Just one blind to provide dim-out across entire opening

Product

SHY® ZIP® blind

Operating Method

Motorised with radio control

Dealer

TaylorWest

Where

Porthallow, Cornwall

Now available with obstacle detection motor technology

Situated right on the beach this new build has a front elevation of 6.4m of sliding, folding glazing which opens out to a veranda to maximise the use of this multi-function facility.

SHY® (UK)'s dealer TaylorWest were asked to provide a dim-out blind to cover the entire front elevation in just one blind so when the bi-fold doors are retracted the opening is left completely clear. The solution was a SHY® ZIP® blind measuring 6.6m x 2.4m, motorised with radio control operation.

As pioneers of the ZIP® system, SHY® (UK) is used to manufacturing blinds of this size. Their 160mm diameter barrel ensured smooth running and minimal deflection across this width, essential for a dim-out blind that has the cloth constrained in the ZIP® side channels. With heat gain through the glazing being identified as a problem TaylorWest specified SHY® (UK)'s Solarblock B50 fabric which has a reflective white backing providing a heat reflectance of 74%. To finish this job off the side channels and heavy duty hem bar were powder coated to the client's exact requirements.

SHY (UK). 1 Bilton Road Industrial Estate
Cadwell Lane, Hitchin, Herts. SG4 0SB.
