

Long, thin and high level

When you need to blackout a high level rooflight it has to be a motorised solution and it has to be reliable. SHY® (UK) have been designing, manufacturing and testing rooflight blinds since 1998.

One blind 1m wide by 12m long. Simple solutions from SHY®

Product

SHY® ZIP® blinds

Operating Method

Motorised with radio control

Dealer

Interlace

Where

Ware Priory, Hertfordshire

So when Interlace posed an interesting challenge of a high level rooflight that was just 1m wide but 12m long the SHY® (UK) team designed a blind that would work time after time after time.

Clever SHY® ZIP® channels help provide the dim-out required but also act as guides to ensure this 12m draw blind runs perfectly

square every time. When fully retracted the blind is virtually invisible from floor level.

Fitted with flame retardant and 100% black-out fabric this blind is operated by radio controlled handset.

SHY (UK). 1 Bilton Road Industrial Estate
Cadwell Lane, Hitchin, Herts. SG4 0SB.
